

Mayflower 400 indoor fabrication space

Specification for build space

- March/April 2019 for approx x4 weeks
- 4000 Sq ft
- Height 5-7 metres
- Heated so that epoxy resin can set 20 degrees
- Equipment needed: We'd bring our own working benches/Glue guns/Hack saws
- Materials used in the fabrication of the puppets: Carbon rod/1" fibre glass tape/Epoxy resin
- Possible carving polystyrenes/Fibre glassing producing resin smell. This would be minimal though
- Storage of dragon puppet needed for potentially 8-12 months
- We'd like to lay our own WISA ply wood floor attached to itself not to the floor
- Bringing our own small scissor lift [Betty]

June/July 2019 for 6-8 weeks

- 8000 sq ft
- Height: Same as above
- Not necessarily heated as it should be warmer at that time of year. Ideally 20 degrees needed though.
- Equipment needed: Same as above
- Materials used: Same as above
- All other requirements as above

Storage for up to x12 months

We will have x2 people working on the fabrication with occasional visits from the designer and director and technical team. A maximum of 8 people in total.
